# SURVIVORS

Derek learns to ride a bike again after his stroke and, above, Stacey works toward her speech goals with her volunteer

Brain injuries and strokes do not discriminate. They can happen to **ANYONE, ANYWHERE, ANYTIME.**

Survivors are your family and friends. They are members of your community.

ARBI helps individuals achieve their dreams of re-engaging in the community, and living fulfilling lives.

Together, we help families heal and rebuild their lives after brain injury.

Donors like Pat (centre) ensure clients like Margo (right) can participate in rehabilitation programs

# DONORS

## About ARBI

ARBI transforms the lives of individuals with acquired brain injury through rehabilitation, community integration and outreach programs. Through a blend of science and compassion, we have united professionals, volunteers and caregivers since 1978 with one goal in mind—making life better for our clients and their families.

This is made possible because of you, the donor.

ARBI relies on donor support for nearly half its operating budget. Our survivors need you, please give today: [www.arbi.ca/donate](http://www.arbi.ca/donate)

Kelli is an emergency room physician and former ARBI volunteer

## Looking for a challenge?

ARBI was founded by volunteers and has a long and proud history of engaging volunteers to give brain injury survivors the best life possible. ARBI welcomes volunteers into a variety of roles—from engaging directly with our clients and carrying out components of their treatment plans to assisting with fundraising events.

Volunteers range from the health care professionals of tomorrow to retired engineers. Volunteers are your neighbours, your company and your family members. Perhaps it will be you.
